WEATHER GUIDE.

The following Table (the result of many years' actual observation) is ascribed to Dr. Herschel. It is constructed upon a due consideration of the attraction of the Sun and Moon in their several positions respecting the Earth, and serves to show what kind of weather will most probably follow the entrance of the Moon into any of her quarters :—

Moon.	Time of Change.	In Summer.	In Winter.
If New Moon, First Quarter, Full Moon, or Last Quarter, happens	Between midnight & 2 A. M.	Fair.	Hard Frost unless wind be S. or W.
	" 2 and 4 A. M.	Cold with showers.	Snow and stormy.
	" 4 " 6 "	Rain.	Stormy and rainy.
	" 6 " 8 "	Wind and rain.	Stormy.
	" 8 " 10 "	Variable.	Rain if wind W.
	" 10 " 12 "	Showery.	Snow if E.
	At 12 Noon, and to 2 P. M.	Very rainy.	Cold and high wind.
	Between 2 and 4 P. M.	Variable.	Snow or rain.
	" 4 " 6 "	Fair.	Fair and mild.
	" 6 " 8 "	Fair if wind be N. W.	Fair.
	" 8 " 10 "	Rainy if S. or S. W.	Frosty if wind N or N E.
	" 10 " midnight.	Ditto. Ditto.	Snow if S or S W.
		Fair.	Ditto. Ditto.
			Fair and frosty.

The nearer midnight any of the Moon's changes occur, the finer will be the weather during the succeeding week ; the nearer noon any of those changes happen, the more foul and wet will be the weather that will follow.

		" Seconds of Arc.

The Astronomical day is reckoned from Noon to Noon through the 24 hours. Thus July 21, 9h. is 9h. A. of July 21st, and July 21st, 15h. is 3h. M. of July 22.

The Sun's Declination and Equation of Time are given for Noon at Halifax, Apparent Time, i.e. when the True Sun is on the meridian.

The Moon's Southing is given in Astronomical Time for the Meridian Passage at Halifax; and her declination when on that meridian.

Both the rising and setting of the Moon are given for every day in the year.

THE TIDES.

The Tides in the Calendar given for the Ports mentioned, are the tides that occur during the day. In the Tide Table (page 57) will be found constants for finding the time of High Water at each of the places mentioned in the Table.

The Times of High Water given in the Calendar have been corrected for the varying distance of the Moon from the Earth, and also for her angular distance from the Sun. They can now be depended on as accurate to at least the same degree as the Admiralty Tide Tables.

It will sometimes be found that when a constant is added to the time of High Water at Halifax, the sum exceeds 12 hours; in this case subtract 12 hours from the sum, and the remainder will be the time of High Water at the required port on the following afternoon or morning, according as the Tide at Halifax was a morning or afternoon Tide.

EXAMPLE.

High Water at Halifax, Jan. 12th 11h. 3m. M.
Boston Light, U. S., add 3h. 22m.

14h. 25m.
Subtract 12h. 0m.

High Water at Boston, Jan. 12th, 2h. 25m. A.

It will sometimes be found that a constant to be subtracted is greater than the Time of High Water at Halifax; in this case add 12 hours to the time at Halifax, subtract the constant, and the remainder will be the time of High Water at the required Port for the previous

COTTON YARNS,

Nos. 5's to 10's.

White, Blue, Orange, Green and Red.

Made of Good American Cotton, with great care, correctly numbered, and warranted full length and weight.

We find it necessary to call the attention of those who use COTTON YARN or WARP to the fact that the YARN made by us is the

ONLY WATER-TWIST YARN

made in the Dominion—no other mill having the machinery on which to make it.

Our Yarn is consequently very much superior for weaving purposes to any other in the market—a fact which is well known to those who have used it for the PAST TWENTY YEARS.

All our Yarns have our name upon the label and none other are genuine.

COTTON CARPET WARP, Made of No. 9's Yarn, Twisted.

White, Red, Green, Blue, Brown and Orange.

Each 5-lb. bundle contains 9,000 yards in length, and makes a length of carpet in proportion to the number of ends in width.

BALL KNITTING COTTON, In all Numbers and Colors.

Made from the finest long staple cotton, especially selected for the purpose. This cotton is very carefully spun, and will be found to be evenly made and correctly numbered. Particular care is taken to have the dyeing and bleaching properly done.

COTTON HOSIERY YARN, SUITABLE FOR MANUFACTURERS OF HOSIERY.

Better than any other made, and so acknowledged by all who have used them. These goods are supplied to all the first class Manufacturers in the Dominion.

JANUARY.—OUR FARMER'S CALENDAR is intended as a monthly guide or reminder of successive kinds of field work and indoor operations, as well as of farm matters in general, that require attention during the progress of the year. It is well known that no two seasons are the exact counterparts of each other, and the farmer or gardener or fruitgrower will be most successful whose crops are selected, and operations carried on, in view of this fact. Crops that ripen well one season, may not do so well on the same farm the next. Some crops thrive best in a moist cool season, others in one with prolonged hot weather, some do best when they have an early start in the spring season, whilst others require a long genial autumn to develop their fullest yield. Thus, of our more important crops, Indian Corn, Potatoes, Tomatoes, Squashes, and others of Southern origin, do best in a hot season, while oats, grass, turnips, cabbages and such like

northern crops, make most growth in comparatively cool weather, or at least require a moist atmosphere. The occasional loss of the hay crop from drought; as has been experienced in Cape Breton Island during the last few years, shews that it is of the greatest importance for a farmer not only to make a judicious choice of crops suitable to the climate, and to the soils and exposures of his fields, but also to have sufficient variety in his crops, so that whether the season should prove a hot and dry one, or cold and moist, or of a medium or average character, he may fairly expect a profitable return. This is the leisure time when plans for cropping can be made. Let it be remembered that a moderately cool wet season will give a good crop of hay, whilst a hot dry one will ensure scarcity of this important fodder. To meet such a calamity a sufficient breadth should always be sown or planted of potatoes, mangles, Indian corn or other crops that are capable of taking the place of hay and which succeed best in a warm, dry season.

BOSTON DRUG cures Drunkenness. J. GODFREY SMITH, Agent, Halifax, N. S.

FEBRUARY is the most trying month for cattle; we cannot too strongly impress the necessity of care in their feeding, watering and general treatment, at this season of the year. Barns may be faulty, and the cold severely felt, and yet this is one of the least evils in Nova Scotia, for horned cattle require plenty of fresh air, and winter and spring rates of mortality in cows in the country barns is low compared to that of the apparently comfortable, substantial wind tight stables of the city of Halifax. The root cellar may be troublesome to get at, and the animal may miss an occasional meal; the wells may be frozen, and the way to the watering places may be so slippery that the cattle cannot reach them without discomfort and danger. In order to overcome these and many other difficulties that appear in February, it is a good rule to give extra time and attention to the stock. In feeding grain and meal always mix them into cut hay, moistened,—and season with common salt. Cut hay does not digest any more rapidly than uncut, but it enables the meal or crushed grain fed with it to be more perfectly digested. Our farmers still suffer immense loss every year in

striving to fatten cattle on meal, bran and middlings fed alone, without being mixed with cut hay as here described. When fed alone the meal simply passes through the animals. In Districts where an Agricultural Society does not already exist this is a good time to organize: farmers have leisure to attend a meeting, and take steps for organization. Notification has to be made to the Office of Agriculture, so that the new society may be sanctioned by the Lieut. Governor-in-Council, before the end of June in order to qualify for the grant for the current year.

MARCH.—The Nova Scotia climate is singularly adapted for the growth of Garden Vegetables and root crops,—yet one of the most lamentable wants on our Nova Scotia farm is the kitchen garden. Instead of finding on every farm a well furnished kitchen garden, filled with vegetables and small fruits, sufficient to provide for the family wants during the year, such an inexpensive luxury is the exception rather than the rule. There is no reason why every farmer's family should not be provided to a large extent with supplies from the garden, such as early salads in the spring time, rhubarb for pies, early green peas, early turnips, lettuce, radishes, cucumbers, early cauliflowers and cabbages, early beans, goose.

berries, currants, strawberries, raspberries, [not the watery wild kinds that grow about the fences, but the luscious fruited European varieties,] winter radishes, turnips, beets, parsnips, artichokes, seasoning herbs, melons, squashes, and dozens of other delicious and substantial articles of food that cost nothing but foresight and some agreeable labor. The nature of our climate necessitates the use of hot-beds for raising seedling plants for those crops that require a long season to mature. A hot-bed is made by piling on successive layers of well-chopped horse dung, obtained from a stable where oats are freely fed. The manure may be raised to a height of two to three feet above the surface of the soil. On top spread four or five inches of very fine and rich soil mixed with sand: this should have been prepared in the fall, and kept dry under cover all winter,—

otherwise it is likely now to be a hard frozen mass. The glass sashes are then to be put on and kept close till the hot-bed heats; the steam and heat will start the seeds of weeds, which may be allowed to grow. Air is then given, and when the heat modifies, weed and rake the surface; sow your spring seeds—cauliflowers, cabbages, celery, tomatoes, &c. for the garden, kitchen and annuals, for flower garden ornament. The seeds will bear a good deal of heat before they emerge from the soil, but as soon as the first leaves begin to appear, the frame must be aired daily, taking care to avoid draughts and exposure to bright sunshine; a newspaper laid over the seed bed forms a convenient shade.

APRIL.—One of the most important operations of the year is spring ploughing, the preliminary to planting and seeding. The operation usually begins in the month of April, but is prolonged far into May, commencing sooner in dry, light

SMITH'S ROSE TOOTH POWDER prevents decay.

soils and warm situations, later where the opposite prevail. Every farmer should be ready to avail himself of the early opportunities presented by the varying years. It is not wise to plough till the soil is comparatively dry, and little is gained by early sowing until the ground is warm. In fields seeded down with timothy last fall, it will now be time to sow clover,—a mixture of red and alsike is the best for hay. Where early potatoes are required, the seed should be kept in a warm place so as to start the eyes, and, wherever the ground is dry enough, they may be planted. This advice if not heeded will lead to potatoes coming up scantily, many rotting in the ground. If farmers instead of planting inert seed potatoes, taken out of a cold cellar, would first allow the eyes to start, there would be fewer complaints of the seed perishing in the soil. Peas and broad beans may be sown at the very beginning of the month; onions, parsnips and carrots

as soon as the ground is fit to be worked sufficiently to give them the more delicate seed-bed they require. Beets and mangel wurzel are usually sown at the end of the month or early in May, but are apt to be weedy if sown too early. All gooseberry and currant bushes should be dressed, apple and pear trees gone over, and, generally, the whole kitchen garden and orchard thoroughly cared for.

MAY.—If the season is not an unusually early one, ploughing will still have to be done; let it be done at once; if manure has to be taken out for crops, don't wait for a more convenient season; if the weather is not all that is desired, proceed nevertheless with your work, vary it to suit the state of the soil and atmosphere. Men cannot fight successfully against the operations of nature, but they can very often turn them to advantage by consideration and forethought. What has to be sown and planted this month? *Everything*, except what has already been committed to the soil, or is too tender to withstand the

coldness or the probable frosts. Such exceptional crops are bush beans, pole-beans, corn, tomatoes, cucumbers squash; it is only in warm, sandy soils that such things can safely be put out before the end of the month. Turnips also should not be sown in May except the small garden patch of early whites for household use. One of the principal marketable crops in Nova Scotia is the potato. It has been found advantageous of late years to plant as early as possible: as soon therefore as the ground is in fit condition, commit the potato to it; see however, that the eyes of the seed have started into growth, otherwise it will be apt to rot in the cold seed bed. Neglect of this point, which has been urged again and again in the Farmer's Calendar of this Almanac, has caused the loss of countless thousands of dollars to our farmers. In light lands the manure

[old and well rotted] may be ploughed in before plantng. In heavy soils, put the manure in the drills, so that the warmth of the air may counteract the deadening effect of the cold wet clods. Superphosphate and other artificial fertilizers may also be used.

JUNE.—Planting and sowing will still continue. Corn for ensilage should now be sown. But, while spring operations have to be continued and finished this month, there are others appertaining more especially to the summer that have to be attended to. Garden crops will require hoeing and weeding; potatoes &c., when sufficiently advanced. It should not be forgotten that we have not only to sow and cultivate, but to protect our crops, if we would gather a profitable harvest. In localities subject to late spring frosts, it is easy to protect early crops by throwing some spruce or other brush over them on cold nights. A method

much used in France, and which may easily be adopted in this country, is to burn brush to windward so as to cover the field in a cloud of smoke. Attention has often been called to such simple and costless devices, and yet year after year, we hear of the loss of early crops; it is said "by frost," we should say "by neglect." The Colorado or potato beetle now challenges attention. Paris green and London purple are undoubtedly efficacious, but they are homicides as well as insecticides, and every precaution should be observed in their use by farmers, and in their sale by apothecaries and store-keepers. The poison is best applied in mixture of ground plaster. Hellebore is also effective and less dangerous, but too expensive where large fields have to be poisoned. As soon as the currant and gooseberry bushes have pushed out their first leaves and blossoms, it will be found advantageous to give them a sprinkling of white hellebore powder in the morning before

the dew is off. This will destroy the first crop of currant worms, and thus preserve the bushes and the fruit crop for the season. The objection to the use of white hellebore on currant bushes (if used early enough in the season) is by no means so strong as to the employment of arsenical poisons as the white hellebore being organic, decays, and is thus speedily rendered innocuous, by exposure to rain and air. Summer bedding plants are set out in the flower garden as early this month as the weather will allow; verbenas may be put out very early, and they thrive better in the moist, cool weather of early June than later, when the soil is apt to be baked by the sun. Stocks are also very hardy and rejoice in hot, dry weather, if they are in good soil. Balsams, Phloxes, Petunias, Geraniums, Heliotropes, and other tender things need not be put out so early, as they will make no progress in cool weather, and the slightest approach to frost will kill them for the season.

Ice Cold Soda Water at SMITH'S DRUG STORE.

JULY.—This month is especially devoted to the *cultivation* of the various field crops. Cultivation, in this restricted sense, means the hoeing of crops, stirring by cultivators and harrows, and such like implements between or over the drills, hilling up and moulding. The objects of these operations are not merely to destroy weed, as is erroneously supposed by many, but to keep the soil open, and thus promote the decomposition of the manure, enable the soil to retain moisture, allow free access of air to it, bring it well over and around the roots and stems, and, by these several means, to promote vigorous growth. We are apt to have a good many rainy days in July, and as most of the hoeing work has to be compressed between planting time and haying time, haying has occasionally to be begun before potato hoeing is completed; this occurs on many of the best regulated farms. In ordinary seasons it is sure to occur on a farm

where foresight is not shown, hence the miserable root crops we so often see. Let our farming readers then be careful to forecast the weather probabilities in light of the July work to be done on the growing crops, and thus avoid the disastrous loss that comes from neglect. The sowing of turnips is usually recommended for the month of June, but as the ground has to be remarkably fine for this crop, and as turnips are often put in to fill up land that was originally intended for the earlier sown roots, it frequently happens that turnips have to be sown in July. In fact, if turnips are sown early in June, they are apt to run to seed, instead of forming bulbs. Some even prefer to sow their Swedes early this month, so as to avoid the "fly," and the soft turnips for immediate feeding need not necessarily be sown till the end of July, although if they get warm, genial weather to start with they do much better earlier. Late sowing, while it is apt to give a small yield, ensures excellent quality, and freedom from fibre, so that turnips intended for table use in winter should never be sown early. The ground should have undergone a thorough pulverization. Light

sandy soil is the best for turnips. They start better after the ground is warm, but the bulbs swell most rapidly during the cold dewy nights in Autumn. The soil cannot be worked too deep, or made too fine, for turnips: the surface soil must be made fine for a seed bed. Town manures are valuable for this crop, and crushed bones have been applied with best effects, either when covered in the drills in the manner of ordinary dung, or, preferably, when sown by machine along with the seeds, so as to be in immediate contact with the latter. In many parts of the province, particularly Yarmouth, Shelburne, Queens, Digby and Annapolis, the important operation of hay harvesting will have commenced this month, and on upland will probably be well advanced, or even finished before the end of the month. All other work has to give way to this. If the weather

is warm and dull, do not hurry the hay into the barn; put it up in large, well built cocks, so as to allow it to sweat or ripen before being put into the mow. Where mows are large this is particularly necessary.

August.—In the northern and eastern counties, and on dyke and intervalle lands, much hay has to be taken in during the month of August. Hay making is the most important operation of the Nova Scotia farmers, half of all his land under crop of every kind being occupied with grass destined to be made into hay. More than half a million acres have to be mown every season, and this necessarily employs for the time a large amount of labor. However, where suitable implements and appliances are used there is now no difficulty in securing the crop. After haying there will be work in top-dressing the hay-fields, and in the garden and orchard. Where the trees are in grass they will benefit by a rich top-dressing around their roots. Look after the ripening fruit, destroy the

caterpillar. If any still remain; pick the early August apples, and send them into a local market or to the picnic. When the rain comes beds of strawberries may be made up. That the ground is well drained and enriched with old manure. Mushrooms now appear in horse pastures, house flies become troublesome, and the swallows congregated in flocks and leave us.

SEPTEMBER.—Grain has to be harvested. Late in the month Indian corn will have to be cut and put into the silos. The ensilage forms an excellent supplement to the hay and roots, but ensilage is still used to only a very small extent. Later in the month, potatoes of the earlier kinds, and earlier planted, will be ready to be taken up, but while the weather remains warm they should be well aired before being put into the cellar, and only in small quantities at a time. The most experienced farmers usually wait for cold weather before taking up their full crop. The farmer's year is a complete cycle, and before one year's annual

harvest is taken in, it is needful to be preparing for the next. In fact it is already time, by the beginning of September, to sow Winter Rye, which is a favorite crop with farmers who have suitable, light, sandy soils.

OCTOBER.—The apple crop is yearly acquiring increased importance in Nova Scotia, and our apple orchards are annually extending. But there is still plenty of room, and no farmer who has suitable land, and is willing to take the necessary care, can make a better permanent investment than by planting an orchard. The best market varieties, at least those that appear at the present to be most in favor among our fruit growers in the counties of Kings and Annapolis, where orcharding is carried on to a great extent are: Gravenstein, Yellow Bellefleur, or as it is more commonly called here, Bishop's Pippin, King of Tompkins, R. I. Greening, Ribston Pippin, Northern Spy, Vandevere, Golden Russet, Nonpareil and Baldwin. Digby County is at present our cherry county, and Cape Breton has profitable plum orchards, but these fruits may be grown all over the province.

Medicine Chests Fitted at SMITH'S DRUG STORE.

Now that the season's work is well nigh over, the young man on the farm may repair to the School of Agriculture and Provincial Farm, Truro, where instruction is given in the art of agriculture and sciences bearing upon it. A post card of inquiry to Prof. Smith, the Provincial Lecturer on Agriculture, will bring full particulars as to the operation and arrangements of the School and Farm, and the terms upon which pupils are admitted. No fees are charged, and students are paid for their work on the farm. Students are not boarded on the farm, but can obtain comfortable board and lodging in Truro at very reasonable rates.

NOVEMBER.—To insure the improvement of cattle, every society keeps or ought to keep a sufficient number of male animals for the use of members. For

beef cattle the Short Horn Durham, Polled Angus, Galloway and Hereford are used. For milk alone, or the cheese factory, Ayrshires are to be preferred. Devons make the best working oxen, are quick, active, and easily fed, and soon fatten in the wild pastures for beef. For Domestic cows, and butter making, Guernseys or Jerseys are the most suitable. The Jerseys have been great favorites, and their increase will promote the manufacture of butter, but it threatens to lessen our capacity for beef production. Holsteins are also increasing but less rapidly, in a few localities; they are large, healthy cattle, combining beef producing with milking qualities—the yield of milk being often very large. Fall ploughing will be the principal field work this month. After ploughing do not forget to go carefully over the water furrows to make way for the exit of the

rain and melting snows that are sure to flood your fields before seed time. A well ploughed, well drained field may be sown in spring as soon as the frost is gone, while one that is irregularly ploughed or has no water furrows, may long remain a puddle, defying every attempt to improve its condition, until the season is so far advanced as to reduce very much the prospect of a crop. The best part of what is too often left to be "Spring work," can be done in the month of November. At the same time care should be taken not to open up gravelly banks or hilly land, subject to be scoured by the Fall and Spring rains, or melting snows. Every season brings loud complaints of the winter-killing of grass in the hay fields. It may possibly be of use to some farmers to say that the

winter-killing is merely another name for neglect. If a hay field not on a dead leve is drained simply by running water furrows with a plough to carry off surface water there will be no water-killing. Where land is perfectly flat a more effective system of draining must be adopted. The want of the simple water-furrows, cost the farmers of this Province many thousands of dollars every year.

DECEMBER.—Agricultural improvement is encouraged and promoted in various ways by the Provincial Legislature. Grants are given once in three years to enable a Provincial Exhibition to be held, and this year, 1894, is the Provincial Exhibition year. There is also a system of Agricultural Societies throughout the

Societies of the Province meet annually on the first Tuesday in November, each in its own district, when the members of each Society receive their Director's report, and select officers for the ensuing year. Full information as to the method of organizing societies, the grants given in aid, and other particulars may be obtained on application at the Office of Agriculture, Old Province Building, Halifax. A register of thoroughbred cattle is kept at the Office of Agriculture, where blank forms of application for registry can be obtained. The printed Herd Register of Nova Scotia Cattle can be obtained from the booksellers for a dollar.

Postage Stamps, Postage Cards, etc., issued by the Canadian P. O. Department.

The stamps issued by the Canadian Post Office Department, are of the following denominations, viz.: postage stamps, $\frac{1}{2}$ c., 1 c., 2 c., 3 c., 5 c., 6 c., 10 c., $12\frac{1}{2}$ c., 15 c., 20 c. and 50 c.; registered letter stamps, 5 c.; 3 c. letter cards and 1 c. and 3 c. envelopes are also supplied.

Post Cards are issued at one cent each, and may be sent to any address in Canada or United States. Reply Post Cards (2 cts.) may be sent to any address in Canada or the United States. Post cards are also issued at two cents each for transmission to the United Kingdom, Newfoundland, St. Pierre et Miquelon, and certain foreign countries. Post Bands are for sale at the rate of \$1.25 per hundred.

1st Class Matter.

Includes Letters, Post Cards, Legal and Commercial Papers wholly or partly written, with the exception of those specially exempted, and all matter of the nature of a letter or written correspondence.

The letter rate for Canada, Newfoundland and the United States is 3 cents per oz., and for other countries 5 cents per $\frac{1}{2}$ oz.

Letters addressed to any place in Canada upon which any postage has been prepaid by stamp, are to be forwarded to their destination charged with double the amount of the postage thereon not so pre-paid, which amount is to be collected on delivery.

Letters addressed to places in Canada or in the United States, wholly unpaid, and letters addressed to the United States on which at least one full rate (3 cents) has not been prepaid, are sent to the Dead Letter office.

RE-DIRECTED LETTERS.

Letters re-directed to places in Canada, the United States and Postal Union Countries, *without being taken out of the post office*, are not liable to any additional postage.

REQUEST LETTERS.

Letters for places in Canada, Newfoundland and the United States sent in envelopes having printed thereon a REQUEST that the letters be returned to the sender if not delivered within a certain specified time, will be returned as requested if not delivered in the time stated.

POST CARDS.

For Canada and the United States, one cent each. For Great Britain, Newfoundland and all Postal Union Countries, two cents each. Reply cards, for Canada and the United States, two cents each. Nothing must be attached to a Post Card, nor must the card be cut or defaced in any way.

2nd Class Matter.

Newspapers and periodicals posted from the office of publication, and authorized to pass free of postage to regular subscribers in Canada Newfoundland and the United States.

3rd Class Matter.

NEWSPAPERS AND PERIODICALS.

Transient newspapers within the Dominion and the United States, 1 cent per four ounces or fraction thereof—but a single paper weighing not more than one ounce will be forwarded for $\frac{1}{2}$ cent. For the United Kingdom and all Postal Union countries, the rate is 1 cent per two ounces, or fraction of two ounces.

A newspaper or periodical must have no cover which can not easily be withdrawn. It must contain no enclosure. It must have no writing thereon but the name and address of the person to whom it is sent.

BOOKS, CIRCULARS, ETC.

The postage on books, pamphlets, circulars, occasional publications, etc., addressed to Canada, is 1 cent per 4 oz. To the United States, Newfoundland, Great Britain and all European countries, 1 cent per 2 oz. The postage on printers' proof sheets, maps, prints, drawings, engravings, lithographs, photographs, sheet music, printed forms, entirely blank, and printed stationery, etc., addressed to Canada and the United States, is 1 cent per 2 oz. No package must exceed 2 feet in length by 1 foot in width or depth. The limit of weight for Canada, United States and Great Britain is 5 lbs.

Seeds, cuttings, bulbs, roots and scions or grafts can only be sent to the United States as 5th class matter; when posted for delivery in Canada, the postage is 1 cent per 4 oz., and the limit of weight 5 lbs.

Commercial papers and legal documents may be sent to Great Britain, all European countries and United States, at 5 cents for the first 10 oz, and 1 cent for every additional 2 oz. These papers, when posted for delivery in Canada, must be prepaid at Letter or Parcel Post rates—but deeds and insurance policies may be sent if prepaid 1 cent per 2 oz.

CLAYTON & SONS, Manufacturers of BOYS' AND MEN'S CLOTHING.

PATTERNS AND SAMPLES.

Bona fide patterns and samples of merchandise, not exceeding 24 ounces in weight, may be sent to any place in Canada at 1 cent per 4 ounces. Must be put up so as to admit of inspection. Goods sent in execution of an order, however small the quantity may be, or articles sent by one private individual to another, not being actually Trade Patterns or Samples, are not admissible as such. The limit of weight to United Kingdom is 5 lbs., and the limit of size 2 ft in length by 1 ft in breadth or depth. Postage, 2 cents for the first 4 ounces, and 1 cent for every additional two ounces.

4th Class Matter.

Closed parcels may be sent to places in Canada. They must be plainly addressed and have the sender's name on the lower left hand corner. No correspondence must be enclosed.

Parcels for Canada must be prepaid 6 cents for 4 ounces, and must not exceed 5 lbs. in weight nor 2 feet in length by 1 foot in width or depth. They may be registered for a fee of 5 cents.

5th Class Matter.

Comprises such articles of general merchandise as are not entitled to any lower rate of postage. Postage 1 cent per oz., or fraction of an ounce. Limit of weight 5 lbs., of size, two feet in length by one foot in width or depth. Matter claiming to be 5th class *must be open to inspection*, and there must be no correspondence enclosed. Packages of 5th class matter may be sent to the United States for the same prepayment as is required within the Dominion, but the contents will be liable to customs inspection and collection of duty in the United States. Sealed tins containing fish, lobster, vegetables, meat, etc., if put up in a solid manner and labelled in such a way as to fully indicate the nature of their contents may be sent as 5th class matter within the Dominion, but no sealed matter can be forwarded to the United States under this head. Liquids, oils and fatty substances may be sent to places in Canada and the United States as 5th class, if put up in accordance with the ruling referring to such articles in the Canada Postal Guide.

FOREIGN PARCEL MAIL.

The postage on parcels for Newfoundland is 15 cents per lb., Jamaica, Barbados and the United Kingdom, 20 cents per lb., Japan, 25 cents per lb., or fraction of a lb., which must be prepaid. The limit of weight to the United Kingdom is 11 lbs. and to Newfoundland, Jamaica and Barbados, Japan, the United Kingdom and foreign countries via England, is 7 lbs. Must not exceed 2 ft. in length by 1 foot in width or depth. A Customs Declaration of the contents and value of each parcel must be filled up at the post office by the sender. Parcels for the countries and colonies with which the United Kingdom maintains a parcel post, can now be forwarded from Canada. For rates, etc., apply at enquiry wicket. These parcels are forwarded by Canadian contract steamers only.

REGISTRATION.

Every article intended for registration *must be handed in at the Post Office*, and a receipt obtained therefor. *On no account must it be*

dropped into a letter box. The registration fees on letters to places in Canada, Newfoundland, the United States, Great Britain and all European countries, 5 cents. It is desirable that the stamp used should be a registration stamp.

All classes of matter may be registered to all destinations in Canada and throughout the Postal Union; and letters may be registered to most of the countries not included in the Union.

Registration Stamps cannot be accepted in prepayment of postage.

MATTER WHICH CANNOT BE FORWARDED THROUGH THE POST.

Any explosive substance, liquid; etc., not properly put up, and other matter likely to entail risk or injury to the ordinary contents of the mail, will be sent to the Dead Letter Office, Ottawa.

Glass in any form is also inadmissible, except eye-glasses, spectacles and microscopic slides, which properly put up and prepaid at parcel post rate or 5th class matter rate.

Letters containing gold or silver money, jewels or precious articles, or anything liable to customs duties, cannot be forwarded by post to any of the Postal Union Countries, except to the United States.

THE ANTIQUITY OF ALMANACS.—The almanacs of the Middle Ages were consecrated almost entirely to astrology and alchemy. The oldest printed almanac of which we have any knowledge appeared at Vienna in 1460. Fourteen years later Regiomontanus, a German mathematician living in Hungary, published a series of almanacs from 1475 to 1506. They contained only the prediction of eclipses and the movements of the planets. In 1579 Henry III., King of France, forbade the almanacs to make predictions concerning political affairs and England then had the monopoly of almanacs, but toward 1775, astrology fell beneath the attacks of satirical writers, and by degrees the almanacs took their present form.

THE TRAPPIST MONKS, at Tracadie, had a flourishing establishment, now destroyed by fire. The Monks are principally natives of Belgium. Here also, there is a Convent of the Trappistine Sisters, all natives of the place, and generally of French and Scotch origin.

THE SISTERS OF THE CONGREGATION OF NOTRE DAME, of Montreal, have flourishing academies for female education of the highest order at Arichat, Antigonish, Pictou, New Glasgow, West Arichat, Sydney, Port Hood, New Glasgow and Mabou. Besides, there are throughout the diocese several academies, and superior and common schools, partly supported by government, and partly by contributions of the people. There are also superior schools at Stellarton, Harbor-a-Bouche and North Sydney, conducted by the Sisters of Charity.

No. 3 Do, 2 balls close up, one on outer and one on inner halliard.

" 4 Do, 2 balls separated, and one close up on the inner halliard.

" 5 Do, a penant of any colour on the outer halliard, and one ball close up inside.

" 6 Do, a penant under a ball close up on the outer halliard, and a ball at the inner halliard close up.

" 7 Do, a penant over a ball close up on the outer halliard, and a ball close up on the inner halliard.

" 8 Do, a penant under two balls close up on the outer halliard with a ball close up on the inner halliard.

" 9 Do, a penant between two balls close up on the outer halliard with a ball close up on the inner halliard.

For 10 Do, a flag of any colour close up on the outer halliard, with a ball close up on the inner halliard.

The above balls, &c., are hoisted on the east or west yard arm, according to the *quarter* the vessel first appears in.

A Ship, a large ball at end of yard, with a small one at inner halliard.

A Barque, a large do at the end, with a small one dropped at inner halliard.

A Brig, a small one at end of yard, and a large one at inner halliard.

A Brigantine, a cross close up at the outer halliard. Two or more do, a cross half hoisted.

A Topsail Schooner, or Schooner wearing a Merchant's Private Signal, a cross close up at the inner halliard.

Two or more schooners, a cross inner, half hoisted.

The upper yard of the Ship Staff is used solely to designate Steam Vessels thus:

Two large balls close up, one at the outer and the other at the inner halliard, E or W, a steamer reported in that quarter.

A small ball at the outer, and a large one at the inner halliard, a very small or regular coasting Steamer.

A large ball at the outer, and a small one at the inner halliard, a large or ocean going Steamer.

Steamers or Sailing Vessels showing owners' or agents' private signal flags, are denoted on the private Signal Staff with a small descriptive penant underneath the private signal.

When the description of vessel is ascertained, the following descriptive colors will be hoisted at the masthead, and the inner ball taken down:

A Union Jack—a Flag Ship.

Man-of-War Screw Steamer, steamer penant, *over* the Union Jack.

Man-of-War Paddle Steamer, steamer penant *under* the Union Jack.

Troop Ship, white penant two blue crosses between steamer penant and Union Jack.

Dominion blue Ensign, under steamer penant, Dominion Government Steamer.

Foreign Men-of-War are denoted in the same manner as English, excepting that the particular National Ensign is substituted for the Union Jack.

Directions to Mariners with Reference to Canadian Storm Warnings, issued for
 Quebec and the Maritime Provinces.

I.—Cone, hoisted with the apex downwards, indicates "moderate
 gale is expected," probably at first from an easterly direction.

II.—Cone, with apex pointing upwards, indicates "moderate gale is
 expected," probably at first from a westerly direction.

III.—Drum, with Cone underneath, the apex pointing downwards,

CLAYTON & SONS, Boys' and Men's Clothing, WHOLESALE AND RETAIL.

indicates fresh to heavy gale is expected, probably at first from a easterly direction.

IV.—Drum, with Cone above, the apex pointing upwards, indicates fresh to heavy gale is expected, probably at first from a westerly direction.

The Cone, when hoisted by itself, indicates that it is expected that the wind will obtain a velocity of 30 miles an hour, but will not exceed 40 miles; and it is not intended that an ordinary well found vessel should stay in port, but simply as a warning to mariners that strong winds are expected from the quarter indicated.

The Drum will always be hoisted when the velocity of the wind is expected to exceed 40 miles an hour.

The night signal, corresponding to Nos. 1 and 3, is two white lanterns hanging perpendicular.

The night signal, corresponding to Nos. 2 and 4, is two white lanterns hanging horizontally.

NOTES.—Mariners will be able to obtain further information from Drum Agents or by consulting the daily probabilities. Mariners should always bear in mind that the storm signals are merely cautionary, and do not necessarily mean that a storm will occur at the place where the signal is displayed, but that one is expected either there or within such a distance that vessels leaving port would be liable to be caught in it.

The storm warnings issued for Nova Scotia, are received from the Central Office, Toronto, Ont.

TEMPERANCE DIRECTORY.

SONS OF TEMPERANCE.—The Order was instituted in New York, Sept 28th, 1842. The first Division was organized at Yarmouth, Nov. 17, 1847. The Grand Division was organized April 22, 1848, incorporated in 1851. There are now two hundred and sixty-four (254) Independent Divisions with fourteen thousand (13,500) members, — 120 Divisions of Hope with 6000 members; *Grand Worthy Patriarch*, Frank Haukenr, Sydney, C. B. *Grand Scribe*, William S. Sanders, Halifax. *Grand Lecturer*, 183 Hollis St. *Agents and Lecturers of Grand Division*, Thomas Hutchings and Thomas M. Lewis. Geo. H. Mackinlay, Halifax, *Secretary of Juvenile Organizations*. Quarterly sessions of G. D. are held 1st week in February, May, and August. The annual session is held in November in Halifax.

INDEPENDENT ORDER OF GOOD TEMPLARS.—The first Lodge in this province was organized at Economy, Colchester, July 4th, 1864. The Grand Lodge was formed February 5th, 1867. The chief officers of the Grand Lodge are *G. W. Chief Templar*, B. D. Rogers, Stellarton; *Secretary*, J. B. Black, Amherst; *Sup. of Juvenile Templars*, J. A. Simpson, Amherst. No. of Lodges, 130, with membership of 6000; No. Juvenile Templars, 48, with 1352 members. The next Annual Session will be held in New Glasgow, commencing 1st Tuesday in July, 1894.

THE WOMAN'S CHRISTIAN TEMPERANCE UNION (WHITE RIBBON), has over 700,000 members throughout the world, and is rapidly increasing in every country. Miss Frances Willard of Chicago, is at head of this movement. Miss Sarah Robinson, 14 Hurd's Lane, is President of the Halifax Union, and Miss E. B. Hart, 51 Lockman St., Halifax, *Cor. Secy.* **THE NORTH END W. C. T. U.**—*President*, Mrs. A. M. Bell, Hawthorne Place; *Cor. Sec'y*, Mrs. Howard McLean, 23 North Park St.

THE W. C. T. U. of the Maritime Provinces numbers about 3,000 members. *Pres.*, Mrs. W. W. Turnbull, St. John. *Cor. Sec'y.*, Mrs. Judge Steadman, Fredericton. *Rec. Sec'y.*, Miss Sarah Robinson, Halifax.

THE N. S. BRANCH OF DOMINION TEMPERANCE ALLIANCE consists of delegates from all other Societies, combining for united action to secure advanced legislation and to enforce existing laws. The officers are: — *President*, Walter McCurdy, Mid. Musquodoboit. *Vice-Presidents*, Rev. S. F. Huestis, Halifax; J. Parsons, Halifax; P. A. McGregor, New Glasgow; Rev. J. S. Coffin, Windsor; Andrew Kirkpatrick, Shubenacadie; Bowman Corning, Yarmouth. *Secretary*, Firman McClure, Truro. *Treasurer*, D. W. B. Reid, Mid. Musquodoboit. The next Annual Meeting will be held in Halifax (time to be fixed by the Executive.)

THE CHURCH TEMPERANCE SOCIETIES and Unions are important factors in this great Moral Reform. Catholics and Protestants of all names are working by means of societies within their own borders; and many of the active supporters of church societies are leaders of the above named organizations.
